

## **LOGICDATA Electronic & Software Entwicklungs GmbH**

[www.logicdata.at](http://www.logicdata.at)

LOGICDATA has set the target to create working and living conditions ergonomically adapted to suit the human being, thanks to innovative motor controls and operating elements for electronically height-adjustable furniture. This makes a valuable contribution towards improving health and comfort as well as increasing safety at the workplace. And at the same time, our products help save energy and so help safeguard the environment.

The business unit LOGICoffice develops and distributes innovative motor controls and accessories for electrically adjustable office furniture. The business unit LOGICcare offers intelligent electronics for comfort furniture. Technological leadership as well as attention to customer requirements has made LOGICDATA a leading supplier of electronics to top-players of the international furniture industry.

LOGICDATA's success results from its qualified employees who ensure the company's reputation on the market through their expertise, dedication and enthusiasm.

This motivation results of LOGICDATA's core beliefs to provide

- an excellent working environment within a highly innovative and international field
- opportunities for personal development
- spaces for interpersonal communication

What we expect:

- Proficiency in at least German and/or English
- University degree (Bachelor/ Master of Science)
- Enthusiasm, creativity
